

EQ 01 M/S

EQ 01 M / S is a 3-band equalizer able to work on mid and side channels.
It is able to encode the incoming stereo signal into M / S signal, then equalizes M/S signal and converts into stereo signal.
It can work also in "encoder" mode.
Can be put in series with "SPAZIAL" or any decoder M / S, but is also designed to work alone.
EQ 01 M / S is a component of the line "SPAZIAL".

3 selectable mode:

INTERNAL - encode stereo signal into M/S and edit the two components via the panel controls. Send stereo signal
ENCODE - encode stereo signal in M/S and edit the two components via the panel controls. Send M/S signal
NORMAL - not encoded signals but you can edit eq .L=mid eq R=Side eq

Eq control for mid and side signals

Virtual Fluorescent Digital peak meter

This is the first component of the line "spazial"
